MOCK INTERVIEW CASE

GOAL: Build a program that can predict the duration time of an online student

Details about Data Set:
- Data is in student_logins.csv
- Each session has start and end time
- Students have multiple sessions and sometimes take different classes
- Account created date is an indicator of how long that student has been participating in the online class

Guidelines:
- Duration time will need to be calculated using the start and end times
- Explain how and why you selected features for you model
- Create a measurement of how well the model performs
